

Project name:**CONSTRUCTION OF ACCOMODATION BLOCKS AT AMAL OILFIELDS**

Client's Name Harouge Oil Operations
(Petro Canada)

Project Value USD 5,969,000.00

Project Location Amal Oilfields, Libya

Project Duration 36 Months

**Project Description**

The project comprises of demolition of old accommodation blocks, renovation of old blocks and construction of new accommodation blocks.

The civil work comprised of steel structure roof with sandwich panels standing on raft foundations, cladding with double leaf insulated reinforced hollow block masonry.

The project included 6 accommodation blocks on the North Side of the Harouge Oilfields Camp in Amal. Each Block has 36 rooms with en suite washrooms and dressing rooms.

The blocks are equipped with fire alarm systems, smoke alarm systems, dry and wet fire suppression systems.

The project was implemented with a specially designed building structure due to high earthquake zone and very loose soil. The project was completed on time and became a basis for acquiring more similar projects in the desert oilfields of Libya.

The area was landscaped with green areas, connecting walkways, fountains and street lights providing the effect of an oasis in the middle of the desert.
