

MAKCO INDUSTRIAL BUILDINGS

Makco specializes in design, fabrication, installation and erection and commissioning of industrial buildings and related facilities. Such projects involve multi-disciplinary construction processes that may include the following;

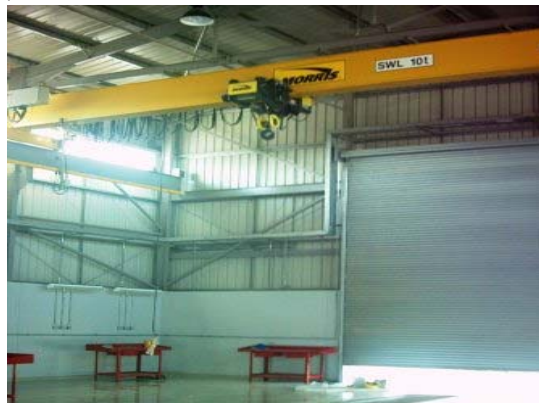

Civil Structures,
Steel Structures,
Cranes and Trolleys,
Cladding systems,
HVAC systems,
Electrical Systems,
Control systems
Rolling Shutters
Fire Alarm Systems
Fire Protection Systems
Industrial Air/ Compressed
Air/ Vacuum systems
Auxiliary Power Generation

Some of the current projects are given below;

- Construction of 1200 sqm heavy Equipment workshop for Veba oil operations at Ghani Oil fields

- Construction of 1800sqm maintenance workshop for WAHA Oil Company at Samah Oilfields

Our Steel structures are manufactured in England with World Class Steel Standards, Cladding Systems from Italy, Cranes from Germany and HVAC systems from the USA, ensuring highest quality standards and specifications required by our clients.
