

MAKCO ROADS

MAKCO provides fully integrated services from inception through to execution & maintenance.

Makco undertakes works like roads and bridges construction, road maintenance, road surfacing & resurfacing.

We plan and carry out all the major constituents of highways schemes in-house so you can rest assured that it is properly managed, completed on-time and within budget.

As roads and bridges contracts of today require inputs and interests from multiple stakeholders, Makco is well versed with creating project based partnerships with public and private entities, in addition to traditional tendering techniques.

Main Services offered are given below;

- Design/ Engineering
- Construction
- Repairs and Maintenance

In addition to a traditional role as advisor, designer and project manager for government departments and other highways scheme developers, MAKCO has significant experience in working with partnering frameworks
